

Maryland Center of Excellence on Problem Gambling

Grant Opportunity

July 1, 2024 – December 31, 2025

Special Populations Grants for Those At-Risk of Problem Gambling

Deadline: November 22, 2024

OVERVIEW:

The Maryland Center of Excellence on Problem Gambling (the Center) is implementing the Special Populations Grants for Those At-Risk of Problem Gambling Prevention Grant Program for the State of Maryland. A special population is a population that has been shown either through National or Maryland data to be at greater risk of gambling problems. A list of special populations at-risk of problem gambling is below. The Program is funded through the Center from funding from the Maryland Department of Health Behavioral Health Administration (BHA).

The Center will be offering limited grant opportunities to community organizations serving populations at-risk of problem gambling in FY 2025. The goal is to fund 25 community organizations, increasing from FY 2024 when 20 were funded. Each grant will be between \$3,000-\$10,000, depending on the reach of the organization and the number of prevention strategies proposed. Grant funding will be available until all funds are expended, by November 22, 2024.

GRANT PROGRAM GOALS:

There are three main goals of the Special Populations Grants for Those At-Risk of Problem Gambling Prevention Grant Program. The first goal is to educate community organizations and the populations they serve on the risks associated with gambling, how problem gambling can be prevented, and the resources for problem gambling help in the State of Maryland. Maryland community organizations become empowered to become leaders in the problem gambling prevention field. The second goal is for community organizations to integrate problem gambling prevention into their work with substance misuse prevention, mental health promotion, and public health promotion for underserved and at-risk populations. This will provide sustainability for problem gambling prevention strategies in Maryland. The final goal of the Special Populations Grants is to have a wider reach to promote public health among Maryland's communities across the State, especially as it relates to problem gambling. With limited funding and resources, working through community organizations that know their communities and have established networks is more efficient for problem gambling prevention.

GRANT DESCRIPTION:

Grantees will be provided technical assistance and support for their prevention programming when awarded a grant. This includes staff training, collaboration on webinars, and/or printed or electronic materials free of charge. Promotional items with the 1-800-GAMBLER Helpline number are provided free of charge for distribution at community events.

Research both Nationally and in Maryland show the following populations are at greater risk of gambling problems:

- Youth (middle school, high school)
- Young adults (college age)
- Males
- African Americans
- Hispanics
- Asians
- Native Americans
- Those at risk of suicide
- Those with poor health
- Veterans and active military
- Those who are less educated
- Those who are low income
- Those who use drugs or are in treatment or recovery from substance misuse
- Those with mental health disorders
- Those involved in domestic violence or child maltreatment
- Those who are incarcerated or involved with the criminal justice system (youth and/or adults)
- Those with brain injuries
- Those who engage in mobile sports betting

In FY 2025, there are no priority areas or regions in Maryland for this grant as there was in previous years. Community organizations representing the entire state, local jurisdictions, or the participants/contacts of a single community organization providing direct services may apply. If a community organization providing direct services applies, prevention strategies should also include reaching beyond those receiving the direct services such as promotion on social media of prevention strategies, reaching parents or others who support those receiving the direct services, and/or other community organizations that collaborate with the organization, so as large a reach as possible can be achieved.

Community Organizations will be implementing strategies according to the Community Anti-Drug Coalitions of America (CADCA)'s Seven Strategies for Effective Community Change. For more information, visit <https://aodpartnership.org/wp-content/uploads/2016/03/seven-strategies-for-community-change.pdf> or <https://www.cadca.org/>

The Seven Strategies for Community Change are: providing information, enhancing skills, providing support, enhancing access/reducing barriers, changing consequences, physical design, and modifying/changing policies.

Examples of each of the Seven Strategies for Community Change are:

1. Providing Information:
 - Dissemination of problem gambling printed materials
 - Hosting a presentation on the topic of problem gambling
 - Social media posts on problem gambling
 - Provide problem gambling information on a website.
 - Promote resources for help: Helpline, Gamban, Betblocker, Gamblers Anonymous, etc.
 - Promote March Problem Gambling Awareness Month.
 - Promote the Holiday Gift Responsibly Campaign.
 - Host a problem gambling screening event.
2. Enhancing Skills:
 - Provide training to community leaders, youth leaders, staff, etc. on problem gambling to train others.
 - Train community health workers, volunteers, or others who provide resources to the public to recognize signs of problem gambling and resources for help.
3. Provide Support:
 - Work through other areas of your organization or other community organizations to support positive activities that promote wellness.
 - Work with other areas of your organization or other community organizations to integrate problem gambling prevention into existing programs.
 - Integrate problem gambling prevention messaging into training sessions or community events.
4. Enhancing Access/ Reducing Barriers:
 - Promote problem gambling prevention tools such as the Helpline, Gamban, and Betblocker.
5. Changing Consequences:
 - If the organization has connections to schools or enforcement agencies, encouraging the use of the 1-800-GAMBLER helpline for someone in need of gambling help to receive services versus ignoring the problem or other punishments.
6. Physical Design:
 - Conduct an environmental scan in the community to assess signage promoting gambling.
 - Promote permanent signage with problem gambling prevention messaging and resources for help.
7. Modifying/Changing Policies:
 - Testify on behalf of a problem gambling prevention bill.

Other prevention strategies recommended by the grantee may also be implemented, if included in the grantee Letter of Agreement.

Grantees may also conduct polls or survey their community. The Center's goal is to develop a community survey that can be used to measure gambling behaviors in Maryland, but this may take a few years before it is ready for implementation.

Grantees will be required to conduct short pre/post-test outcome surveys at the beginning and end of the grant period. The pre/post test is being developed and will be provided to grantees for their use around the time Letter of Agreements are signed.

RESEARCH:

Maryland Gambling and Problem Gambling Facts:

- 90% of Maryland adults have gambled in their lifetime (Tracy et al., 2022).
- The most common forms of gambling are lottery, casino, and sports betting (Tracy, et al., 2022).
- Those that gamble are more likely to use tobacco products, alcohol, and/or illegal drugs compared to non-gamblers (Tracey et al., 2022).
- According to the Statewide Gambling Prevalence in Maryland, 4% of Maryland adults 18 and over are disordered gamblers (Tracy et al., 2022).
- Some minority populations were more likely to be disordered gamblers; Maryland adult African Americans (8%), and Asians (3%), are at equal or increased risk of problem gambling compared to the White population (3%) (Tracey et al., 2022). More data needs to be collected on the Hispanic population.
- 20% of Marylanders who gambled on sports on-line were disordered gamblers (Tracey et al., 2022).

GRANT APPLICATION CRITERIA:

To Be Eligible to Apply:

1. Must be a community organization in Maryland.

The Application Must Include:

1. Information on the community organization's contact, including name, phone number, and email address.
2. A description of the community organization that will implement the grant.
3. Description of the population served by the community organization.
4. Selection of at least three prevention strategies.

Grantees Must Agree to:

1. Meet with the Prevention Manager to discuss grant deliverables.
2. Must track grant activities and submit reports to the Center in June and December 2025.
3. Submit copies of all original work to the Center.
4. Use the Public Awareness Policy on the Use of Gambling Imagery.
5. Take at least two of the Centers webinars or trainings during the fiscal year.
6. Attend the Annual Maryland Problem Gambling Conference in June.

When selected for funding, the community organization will meet with Center staff to refine the prevention strategies. The letter of agreement will be drafted and then approved for language by the community organization and the Center. Once approved, the letter of agreement will be signed by both parties. When the letter of agreement is signed, the community organization can begin to work on the prevention strategies. Each community organization must propose at least three prevention strategies in their grant application. Others can be added based on the initial meeting with the community organization and the Center. Prevention strategies must be completed by December 31, 2025

One check will be dispersed by April or May of 2025 after a w-9 form and invoice has been submitted by the community organization.

GRANT APPLICATION PROCESS AND CONTACT INFORMATION:

Grant applications will be accepted through this link:

<https://www.surveymonkey.com/r/FM5GPYW>

Grant applications will be accepted until November 22, 2024, or until all funding is allocated for fiscal year 2025. Applicants are encouraged to apply early as applications will be evaluated on a rolling basis until November 22, 2024.
